YOU WON'T SACRIFICE BEAUTY,

WE DON'T SACRIFICE NATURE.

Old-growth Teak is one of the rarest and most beautiful woods on earth, but harvesting these 100-300 year old trees destroys the surrounding forest and the other living things inside it. Each year 32,000,000 acres of tropical rainforest are destroyed. IndoTeak Design believes in protecting the most vibrant and diverse eco-systems on the planet. Indoteak gives new life to old-growth Teak reclaiming 100-500 year old beams from buildings that are slated for demolition. The beams are handcrafted into the most beautiful, durable and sustainable wood products on the market. The Rainforest Alliance recognizes Indoteak Design as the leader in the industry and has awarded us its coveted Sustainable Standard Setter Award. *Indoteak Design, for a beautiful life.*
